SUMMARY

Software engineer with a variety of skills in web development, proficiency in creating and implementing successful dynamic front and back end web applications and a knack for resolving challenges. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

100 Devs New York, New York

December 2021- Present

Software Engineer

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Hempstead Public Schools Hempstead, NY

February 2019- March 2020

Grant Technician/ Tutor

- Tutored and mentored the class of 2021 from middle school to high school in Math and Science
- Assisted numerous teachers in preparing lesson plans for assignments, daily classwork, and projects
- Engaged with students who may need help reaching out for extra support or guidance

PROJECT

Leetcode Note Tracker (Fullstack Web App) - User can input notes and information about leetcode problems then have access to their list of problems to review at a later time

FDA Info Receiver (Fullstack Web App) - User can input different filters and retrieve a list of either products with their reasons for being recalled or products that have been recalled and their effects on the consumers
